SUFFRAGE REALIZE WELL

FOR ADDIE BURNS.

A New Haven dispatch on Friday said:

With the approval of the directors of the New York, New Haven and Hartford Railroad Co., the engineers of the company are completing final arrangements for the building of a new bridge over the Thames river at New London. The present bridge was built in 1888 and 1889 and was originally a two track structure. In 1908, however, owing to the increase in the weight of equipment, it was necessary to limit the use of the bridge to single track operation.

When the new bridge is finished the old bridge will be given by the New Haven road to the state of Connecticut for use as a highway bridge, thereby improving and shortening the wagon and motor road along the short road to a marked degree.

Old Bridge Cost \$1,300,000.

from 75 feet to 142 feet to reach sultable bearing strata. The pier on the east side will find bed rock at 75 to 100 feet, one pier will be constructed at the 110 foot level and two at 142 feet. These piers will be of concrete with masonry facing between high and low water. Three piers will be constructed by the open well dredging process and the fourth will be built under the pneumatic caisson process. The extreme dimensions at the four-

Old Bridge Cost \$1,300,000. The present bridge, with its approaches, cost originally \$1,300,000, and is a five span structure, the length of each span from west to east being 150 feet, 310 feet, 503 feet (draw span of the swing type), 310 feet and 150 feet.

The action of the directors of the New Haven in approving the final plans for the new bridge is in line with the policy of Elliott administration, to put the property in a position to do the maximum amount of busi-ness and to perform its duties as a common carrier with the utmost safety and efficiency. The operation of the Thames river bridge as a single track has reduced the capacity and efficiency of the entire main line from Boston to New York and it has been the intention of the directors to cor-ect the situation just as soon as there as any financial ability to do so.

New Bridge to Cost \$2,500,000. The new bridge and approaches will cost approximately \$2,500,000 this amount is only one-tenth of the minimum amount that President Ellott estimated will have to be expended in the next five years for new equipment; for better ballast on certain lines so as to increase safety, preserve ties and keep down dust; for improved and added signals so as to increase safety and capacity of road; for added trackage, yards and sidings; for improved terminal facilities at many coints so that better care may many points so that better care may be taken of motive power, better working conditions created for em-ployes and better service given to the public, and for an indeterminate amount of minor improvements. To accomplish all this and to put the

CHAMBER OF COMMERCE accomplish all this and to put the company in a position where it may operate its trains with the greatest economy, efficiency and safety, will mean the expenditure of at least \$25,000,000 to \$30,000,000; but as the situation at Thames river has been for several years a drawback to efficient operation, and as it is beyond doubt the "pinching" point in the main line between New York and Boston, the directors have now that net earnings directors have, now that net earnings are somewhat better, authorized the

> FOUND WOUNDED BUCK SWIMMING JORDAN COVE John Reiger Discovered Animal Just Legislative—Louis R. Cheney, Hartford, chairman; George Burnham, Middletown; F. T. Wheeler, Plainville; E. W. Schultz, New Britain; Ralph O. Wells, Hartford; C. A. Colley, Waterbury; Joseph Whitcomb, Bridgeport; G. F. Davis, Windsor; W. A. Somers, Norwich; E. D. Steele, New London; C. H. Tredennick, Meriden, Resolutions—Frank E. Sands, Meriden, chairman William A. Howell, Rockville; H. P. Dunham, Wethersfield; W. C. Norris, Willimantic; G. F. Drake, Winsted.

One of the largest buck deer that has been seen in these parts in many months was found struggling in the dons asking that she be released from waters of Jordan cove at Waterford near the Pleasure Beach dock Thurs-day about noon by John Reiger of Great Neck. Reiger, getting a boat, rowed out to the animal and seeing that it was badly injured, rowed ashore and notified the game warden, who instructed him to kill the animal at once and dispose of it as he saw fit. By the time that Reiger has rowed to the animal again, it had died, so he towed it ashore and dressed it at

When it was dressed the deer was found to be shot in several places but probably the shot that killed the animal was the one that was found in the left foreleg, right on the knee, which must have been fired at very close range by a poor marksman as the knee was so badly splintered and shot away that it was just hanging by the skin, but was evidently a freshly made wound. It is thought that the animal swam the cove from Millstone to Pleasure Beach and the long swim and the combined loss of blood swim and the combined loss of blood weakened the animal so that it died of exhaustion. On the opposite side from the broken leg the neck of the animal was well filled with as many as 50 large sized shot and on the side where the leg was broken on the animal's shoulder three large buck shot were found, but the shots in the neck and on the shoulder were only through the animal's hide and did not pene-trate the fiesh. On the right hind quarter a shot which looked as though it came from a .38 calibre rifle was found imbedded about an inch in the flesh, which showed that the animal was shot by somoone when it was trying to get away. The animal, dressed, weighed about

200 pounds and was in excellent flesh. The head carried a pair of beautiful five-point antlers and the head and antlers will be preserved by

the increment weather had but lit-the effect on the size of the crowd that awaited the opening of the door at the rummage sale held Friday by the Norwich Equal Suffrage league in one of the Thayer building stores. The CONVENTION REPORTS. Broadway Sunday School Delegates Told of State Meeting at Stamford.

A social for the teachers of the Broadway church Sunday school was held on Friday evening, beginning at 8 o'clock, when Superintendent Herbert B. Cary welcomed those present and introduced two of the members of the school, who gave interesting re-ports of the recent state Sunday school convention at Stamford. The speakers were Mrs. Osten T. Ferguson and Mrs. John Steel. They Ferguson and Mrs. John Steel. They were given votes of thanks for their reports of the convention.

Cocoa and cake were served at the close of the evening.

The Preston City Congregational church was represented at the Eastern Connecticut Branch W. B. M. at Mystic Thursday by the pastor, Rev. Luther M. Keneston, and Mrs. Keneston, Miss Helen B, Miller, Mrs. Berlah E. Bur-dick and Miss Fanny Cowan. Peking is rigidly regulating auto-

BEST LIVER AND BOWEL LAXATIVE FOR FAMILY USE

"CASCARETS" REGULATE WOMEN, MEN AND CHILDREN WITH-OUT INJURY.

TAKE WHEN BILIOUS, HEADACHY FOR COLDS, BAD BREATH,

process and the fourth will be built under the pneumatic caisson process. The extreme dimensions at the foundations will be 42 feet by 98 feet, and it will require about 48,000 cubic yards of concrete to construct the piers. In the approaches it will be necessary ot construct two small bridges to accommodate the state pier and one small bridge over Fairview avenue. For some time the company has been carrying on the work of realigning the track on the west side of the Thames river at Winthrop cove and while this work is being carried on distinct from the main structure it is really a part of the Thames river bridge work. Much of this work is completed at the present time and trains are now going over a portion of the new tracks, but upon completion of the new bridge the full benefits of this work will be felt in more economical operations of trains. The approach on the west side of the present bridge is a jong and sharp eight degree curve. Under the new arrangement this curve is lengthened out somewhat and the degree of curve is materially lessened to six degrees.

Finished in 1917. Instead of nasty harsh pills, salts, castor oil or dangerous calomel, why don't you keep Cascarets handy in your home? Cascarets act on the liver and thirty feet of bowels so gently you don't realize you have taken a cathartic but there are thoroughly and can tic, but they act thoroughly and can be depended upon when a good liver and bowel cleansing is necessary—they move the bile and poison from the bowels without griping and sweeten the stomach. You eat one or two at night like candy and you wake up feeling fine, the headache, biliousness, bad
breath, coated tongue, sour stomach,
constipation, or bad cold disappears.
Mothers should give cross, sick, feverish or bilious children a whole Cascaret
any time—they are harmless and safe any time-they are harmless and safe for the little folks.

AMERICA'S PROTEST ON CONTRABAND LISTS Will Be Sent to Germany and Austria

as Well as Entente Allies. As soon as the contracts have been let work upon the new bridge will be begun and it is expected that the structure will be fully completed in 1917, when one of the most difficult points on the main line of the New Haven system will be eliminated.

Not only will the new bridge mean a saving in time and an improvement in the last note to Great Britain re-Washington, Nov. 19 .- America's

In the last note to Great Britain rea saving in time and an improvement in the service of the New Haven railroad, but it also represents another step in the development of New England's transportation facilities. The present bridge is less than three decrease of the transportation of the service garding interference with neutral trade Secretary Lansing gave notice of an intention to make contraband the subland's transportation facilities. The ject of later communication and prep-present bridge is less than three dec-ades old, but for several years it has been inadequate for the service de-that when it is forwarded to London wirtually identical notes will be des-struction of this bridge which is to be patched of the Teutonic allies an to

abandoned by the New Haven, trains France and Italy, were transported across the Thames by ferryboats and before that passen-concerned, official coming protest as more or less academic in view of the fact that their commerce raiders and cruisers no longer are on the high seas and their gers were required to disembark on one side of the river, take a ferry across and reembark, upon another The plans under which the new bridge will be built were worked up by the engineering department of the New Haven road under the direction of Edward Gagel, chief engineer I. D. Germany has promulgated a list of Waterman, construction engineer, and

in opening and closing for vessels to deep rivers like Columbia, Williamette to recall to the belligerent powers the pass up or down stream as compared and Missouri. The plans finally adopt- jractices of nations in the treatment of contraband prior to the present was and even before the London conference which eventuated in the declaration of London. The right of a belligeren to extend the list of absolute contra-band beyond the limits recognized by international law before the outbreak of war will be challenged and partic ular objection will be made to whole sale additions to the contraband lis Addie Burns of New London, when as in the case of nearly all of the

present belligerents.
That declaration of contraband should be limited to articles not merethe state prison at Wethersfield, will have to meet the opposition of State attorney Hadlai A. Hull. Attorney Hadlai A. Hull.

Major Hull was asked on Friday, said the New London Day, if he would oppose the application for pardon.

"Yes, I will," he replied. "Unless something unexpected comes to me before the board meets, I fully expect to."
